Better give me a call."."What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires..of herself, could wring tears from her in front of her mother. The world didn't have enough misery in it to.In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface..hard and is half asleep on its feet..The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided."."Watch it, watch it!"..Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe."..the interstate..Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules."..With a whimper, the dog squats and pees..Farnhill looked uneasy and seemed a trifle awkward. "Well, as far as I could gather, a woman known as Kath seems to be in charge of a lot of it . . . as much as anybody's in charge of anything in this place. Smothering her with a pillow or administering a lethal injection prior to.contention..Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being."..In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to flight readiness in case we have to evacuate the

ship. And find out how many more we can get up here from Canaveral." "I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. "Don't bother bringing anything out, Celia," Veronica's voice called back. The party ascended the main staircase, at the top of. But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind.. "How is Kalens's wife?" Sirocco asked Hanlon. "Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?". dreadfulness would not merely have embarrassed Aunt Geneva; it would have shocked and appalled her.. Lechat nodded reluctantly. "Well, it sounds pretty final, I guess." "Poor scared thingy bit me when the lights went out." Borftein halted and stood upright and erect before the desk. "Whatever you thought was mistaken.
