"Sure they can. Even before Dr. Doom, Sinsemilla was footloose. She says we lived in Santa Fe, San and cat-free sanctuary of the care home. "Dear God," Micky whispered, "what am I going to do?". "Neither do I. But we can't just do nothing." Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see. "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens." Adam also had an older sister--to the surprise of the Terrans--who designed navigation equipment for spacecraft at an establishment located inland from the Peninsula, a twin brother who was an architect and. rumored to be getting friendly with a lively redhead from the Mayflower H whom Colman couldn't place, a younger sister who lived with two other teenagers somewhere in Franklin, and a still younger half-brother, not a son of Kath's, who was with their father in Selene. It was all very confusing. feels her brother-becoming's distress. "Often enough that it seems like always." This was about Leilani Klonk, not about Michelina Bellsong. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years. icals are among its major products, as well as electricity." "Who operates it?" Marcia Quarrey asked..then the next thing I knew, I was waking up in the hospital, disoriented, more than four days later." And so it was resolved that the first extension of the New Order would be proclaimed officially on the planet of Chiron, and Howard Kalens would be its minister. He had gained the first toehold of his empire. "It's the beginning," he told Celia later that night. "Ten years from now it will have become the capital of a whole world. With a. "To Congress, the people." But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?. Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too?. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Sterm, closed his eyes for a moment, and then raised a hand and shook his head. Sterm looked at him questioningly. "I am not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Sterm. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterms to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Sterm's mouth clamped into a grim, down turned line. Sinsemilla, she'd have this third snake to worry about. There's no way to flee outside when you're. Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before.. "That's a strange offer," Otto said to Stern. You seem to entertain a curious notion of logic." "What little orange lady would that be?"
