"I mean it." nearby, on West 28th, and were interested, primarily, in the television shows they'd seen when they were. They built a separate shelter inside the dome, not really talking aloud about what it was for. But it did. shifting, and the physical space allowed is so small that critics welcome any way of expressing judgments. rebound, only to be thrown over for Ralston..THE COMPANY REPRESENTATIVE: I will be brief. Common people, even uncommon ones, tend to romanticize reality, often to fantastic extremes, and invariably in these days romanticism acquires religious overtones. In the present instance a perfectly practical undertaking has been interpreted, on the one hand, as an attempt on the part of the King to get high enough above the ground so he can shoot an arrow into Heaven and, on the other hand, as an attempt on the part of the local citizens, especially the rich ones, to provide themselves with an avenue into Heaven. The two interpretations have somehow intermingled and become one. The absurdity of the second is self-evident and unworthy of closer scrutiny. The absurdity of the first is also self-evident, but for the record I'd like to cite a few pertinent facts.. "Well, that all sounds pretty ho-hum to me up against this," Song said. "Do you ... do you realize . . . what are we talking about here? Evolution, or ... or engineering? Is it the plants themselves that did this, or were they made to do it by whatever built them? Do you see what I'm talking about? I've felt funny about- those wheels for a long time. I just won't believe they'd evolve naturally."..my calls." She lowered her eyelids demurely. Crawford had thought of no better way to describe it. Each of the plastic spikes had blossomed into a fanciful windmill, no two of them just alike. There were tiny ones, with the vanes parallel to the ground and no more than ten centimeters tall. There were derricks of spidery plastic struts that would not have looked too out of place on a Kansas farm. Some of them were five meters high. They came in all colors and many configurations, but all had vanes covered with a transparent film like cellophane, and all were spinning into colorful blurs in the stiff Martian breeze. Crawford thought of an industrial park built by gnomes. He could almost see them trudging through the spinning wheels..She threw up her hands. "How can I make you understand? This is nothing like anything I've ever flown. You might as well. . ." She groped for a comparison, trying to coax it out with gestures in the air. "Listen. Does the fact that someone can fly a biplane, maybe even be the best goddamn biplane pilot that ever was, does that mean they're qualified to fly a helicopter?"..we go through the positions.
