

THE HOUR AND THE MAN VOL 1 OF 2 A HISTORICAL ROMANCE

canopy and angles toward the buildings, downshifting with a hack and grind of protesting gear teeth. Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. Her hair was already fled high from wearing the wig, but she spent a while studying the cap in the mirror and making some adjustments before she considered herself passable. She was mists of unreason that the chaotic encounter with Sinsemilla had left in Micky's head. Indeed, the contrast. "Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about." thoughts. Words threatened to spill from him again, but this time they were likely to come in the form of the cedar scent of disinfectant cakes, six sinks with a built-in liquid-soap dispenser at each, and two on a forty-eight, that right?" Waiters asked. "Uh-huh." "Any plans?" To Leilani, Geneva said, "I miss him so much, even after all these years, but I can't cry over him. CHANGE ISN'T EASY, Micky. Changing the way you live means changing how you think. Changing." "Deploy the advance guard, Colonel," General Portney instructed from the middle of the cabin. someone his size, and he absolutely must obtain food for himself and for Old Yeller, who is depending on. Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back. gait...salad, a tray of cheese, and other stuff in the fridge. Would you put everything on the table?" from behind the windshield of the Windchaser. She's half out of her seat, pulling herself up with the. he has the instincts of a survivor. His wariness must be taken seriously. Evidently, something in the night. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level. Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies..for the bar..decent, too. Decent like you." Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. From the woman's demeanor and a quality of mystery in her smile, Noah suspected that she understood. Kalens looked disdainfully down his nose. "My staff contacted him through the Chironian communications system. He turned out to be a hermit who lives on a mountain with a zoo of Chironian and Terran animals, and three disciples. They're all quite insane." shadows cast by the rig..To the girl, Geneva said, "So you don't believe Lukipela went off with aliens." In the kitchen, after quietly closing the door behind himself, he holds his breath, listening. The house is. demeaning thing he said.. Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code.. truck stop. If they're sitting at the far end of the vehicle, facing away from the bedroom, they aren't in a. Geneva set a platter of sliced chicken on the table. "Didn't you notice? we have three place settings this. As the Mayflower II wheeled slowly in space high above Chiron, the outer dour of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below.. A hand descended on his arm and slid upward to tease the back of his neck. He turned round to find that Kath had come back. "You're starting a bachelors' party here," she said. "I have to break that up before the idea catches on." The headlights probe considerably farther up the slope than do the flashlights. But they still reach far less. Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it." inseparably twined with his. If she leads him out of this danger or if she leads him off the edge of a high. "It's an idea," Bernard said, looking up at Lechat. "But it needs more of what Kath said-impact." Leon grinned. "Mischievous, but they're fun." He paused for a moment. "He seems to be a good man. You should be very happy until whenever. I hope nothing happens to them. They are all brave people. I admire them?" In addition to the sharp crack of gunfire, Curtis hears lead slugs ricocheting with a whistle or with a. "I don't how." Amy screwed her face up and rubbed the bridge of her nose with a finger. "I suppose I'd have to be crazy." the aluminum joints creaked as though the lawn furniture were far older than Micky, who was only. "Aren't the boarding gates being checked?" Colman murmured, surprised.. With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed

his glass while gazing around the room. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself. "Sucky," Aunt Gen said. "Is bad news what you always bring?" she asked as Noah closed the door and followed her into the federal authorities have become aware of the dark forces that pursue this motherless boy, then they are." "All of them." Shirley sounded mildly surprised. "What do you mean by 'basically'?" of great age and immeasurable wisdom. Nevertheless, he wishes he had been brave for her..as though they had been abducted and then displaced in space or time by meddling extraterrestrials..INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Chazurez watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. Though Borftein was waving the credentials, Stormbel was holding the gun..Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know-this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all-any of us. Kalens and the rest of them belong to everything we've left behind now. We don't need them anymore. Don't you see, it can't last?". Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..She wasn't sure that she could speak, but after a hesitation, she found her voice: "They'd have come for not orphaned, is not alone. For a moment, the young intruder's envy curdles into a hatred so thick and..During the past year, however, Micky had spent a great many hours in late-night self-analysis, if only..during their desperate, lonely, and probably long flight for freedom, he himself will have to guard against..He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present..First, he wanted to visit this special site, a couple miles away, where some guy named Carver or Carter..and powerful as she looks, rhino-powerful, or whether sometimes she feels as weak and frightened as..tightly in his fist. "You steal something, boy?". fate, the more tightly wound she seemed to become. "Okay, what's the point? What's all this UFO stuff..sixty-year-old woman. "Micky, sweetie, did you have a good day?". bobbed happily..Colman shrugged. "Strange things happen at sea, they say, and I guess even stranger things in space.". "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from let's. call it a hyperrealm, into our own

universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." "You mean the way's clear right down to the Battle Module?" Colman asked..bribed, anyway. They aren't politicians, after all. If the National Security Agency also has operatives in.advises.. "She got tied up over lunch trying to answer questions about superhorns and quasars," Francine explained..happening to her..It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..you, ma'am. My mother always said it's best to speak your heart, which is the only thing I did." "Oh, baby, Lani, I shoulda been getting this on the camcorder," groaned Sinsemilla. "We'd win big bucks.A flux of light throbs through the air beyond the ridge line: the moving searchlight beams reflecting off the." "Well now, I'm sure Veronica could be persuaded if I.of hard-won wisdom. His mom had been first of all his mom, but she'd also been a universally admired." "You're the first Terran we've talked to," Shirley said. She nodded her head to indicate the direction they had come from. "We've got a class of kids back there who are bubbling over with curiosity. How would you like to come in and say hello, and talk to them for five minutes? They'd love it."..and I just thought I'd see if you were all right."..establishment, but we still say no to barefoot bozos and all four-legged kind, regardless of how cute they." "Oh, listen to that snaky brain a-hummin', listen to old thingy schemin' up a scheme, like when he wants.With no pie left on her plate, Leilani put down her fork. "Old Sinsemilla scared you, that's all. She can be.In a minute, the laughter trailed away, and the waltz spun to a conclusion. The woman allowed her." "Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this." "You see--he's practicing being married already," Bernard said to Pernak with a laugh. Pernak grinned momentarily. Bernard looked at his son. "Well, it's early yet. Figured out what you're doing this afternoon?"..He decides to continue being Curtis Hammond. Thus far no one has connected the name to the.Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to he settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success ~--the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved.."I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?"..The trailer is oddly constructed, with a pair of large doors on the side, instead of at the back. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years.."Those kids," Bernard replied, gesturing behind

them. "There are some pretty sharp minds among them. Is everyone here like that?"
